Environmental Policy

Introduction

With more than one hundred years of tradition, Textile Factory Trgovišće (TTT) is committed to producing high-quality textile products in a way that respects the environment, our employees, and the community in which we operate. Acknowledging our responsibility as a textile manufacturer, our mission is to continuously reduce negative environmental impacts and contribute to sustainable development through innovation and responsible business practices.

Compliance with Laws and Standards

TTT is committed to complying with all environmental laws of the Republic of Croatia and the European Union, as well as international standards such as the OEKO-TEX® certification. Our policy is based on applying best available practices and operating transparently in line with the principles of sustainability and responsible business conduct.

This Policy is aligned with the United Nations Sustainable Development Goals (UN SDGs), the Paris Agreement, and the European Green Deal, and is implemented in accordance with the OECD Guidelines for Multinational Enterprises.

Resource Management

- We use energy and water responsibly, aiming to reduce consumption through continuous improvement of production processes.
- We work to reduce greenhouse gas emissions and support the use of renewable energy sources.

Materials used

- We prioritize natural and certified raw materials such as cotton and linen.
- We do not use dyes or chemicals in our own processes, and we expect all suppliers to adhere to strict chemical management practices, using only certified substances that are proven safe for people and the environment.
- We actively develop products with a lower ecological footprint and a longer life cycle.

Waste and Recycling

- We systematically reduce waste generation and encourage the recycling of by-products and textiles.
- All forms of waste, including hazardous substances, are disposed of responsibly and in compliance with regulations.
- We use recyclable or biodegradable packaging materials.

Pollution Prevention and Circular Economy

- We implement measures to reduce wastewater, noise, and emissions.
- By promoting circular economy practices, we work on reusing materials and reducing overall environmental impact.
- Our products, including hotel and household bed linens, are designed for long-term use and durability and, as verified by testing at the Faculty of Textile Technology in Zagreb, maintain their quality even after 250 washes at high temperatures.

Continuous Improvement

- We set clear environmental targets and measure results.
- We invest in new technologies and innovations that reduce resource consumption and emissions.

Employees and Partners

- We actively educate employees on sustainable practices and encourage their participation in achieving environmental objectives.
- We build partnerships particularly with suppliers who also adhere to high environmental standards.
- We educate customers on the proper care of our products to extend their lifespan while reducing environmental impact.

Accountability and Transparency

- The Management of TTT assumes full responsibility for implementing this Policy.
- The Policy is publicly available on our website and communicated to all stakeholders.
- We are open to external audits and reviews to ensure greater transparency.

Date and Signature

This Policy enters into force on the date of adoption and remains valid until revised. It will be regularly reviewed and updated to reflect our objectives, legal obligations, and best practices.
